## **Manufacturing Indonesia 2018 Series of Exhibitions to Speed Up Technologies at the Forefront of Global Business Innovation**

**Jakarta, December 10, 2018** - Manufacturing Indonesia 2018 Series of Exhibitions, the largest international exhibition of manufacturing technologies and services in Indonesia, ended on a high note marking a tremendous 32 years of expertise by providing thousands of smart machines with embedded manufacturing technologies from over 28 countries. Being held in conjunction with Machine Tool Indonesia, Tools & Hardware Indonesia, Industrial Automation & Logistic Indonesia 2018, and the inaugural industrial subcontracting exhibition, Subcon Indonesia 2018, technological breakthroughs presented in presented a first-ever Industry 4.0 Showcase at the event, attracting 34,959 potential buyers and industry professionals.

"Above 1,600 key industry players have successfully reinvent the manufacturing industry and be pioneers of smart factories here in Indonesia. Showcasing thousands of latest machinery and automation technology, we are delighted to be the conveyor of industry 4.0 roadmap in Indonesia, as well as preparing Indonesia in embracing the new era of globalization," said Maysia Stephanie, Project Director of Pamerindo Indonesia, the organiser.

Setting up a nerve centre for industry-leading technology, data-driven solutions and additive manufacturing were being most anticipated breakthroughs at the event, which enable people to automatically connect with the intelligent industrial and electrical machines. Data-driven solutions comprises key technologies in the nine pillars of the IoT, such as big data & analytics, cloud, and augmented reality. Key exhibitors showcasing these technologies include DMG Mori, Fanuc Indonesia, First Machinery, Inti Inovasi Teknologi, Kanematsu KGK Indonesia, Indoserako Sejahtera, Indo Kompresigma, Mitsubishi Electric Indonesia, Mitutoyo, and Prima Tigon Global.

"We foresee Indonesia to be seen as future economic giant, with support from government to ease the regulation, predominantly in developing R&D and manufacturing infrastructure. Most machines are now very connected to Wi-Fi and internet, thus, what gave rise to this fourth industrial revolution is a rapid internet connectivity to accelerate the adoption of Internet-connected technologies across industries," added Tony Sartono, Commissioner of Kawan Lama Sejahtera, one of the key exhibitors.

According to a data by World Bank in 2017, Indonesia's contribution in manufacturing sector now boasts the highest rank in Southeast Asia, estimated to reach 20,5% to the world economy. A research from United Nations Industrial Development Organization (UNIDO) added that Indonesia ranks number 4, out of 15, in the list of countries with highest contribution of manufacturing sector to GDP over 10%.

"Our participants were really satisfied with the outcome of this event. They said they could have more promising business negotiations than they had expected, meetings with many excellent buyers. Japan will consistently support manufacturing industries in Indonesia through not only technology transfer but also human resource development so that Indonesia can be the No. 1 production base in ASEAN," said Keishi Suzuki, President Director of JETRO (Japan External Trade Organization) Jakarta Office, which bringing 40 Japanese excellent manufacturing companies to participate at the expo.
